

Paediatric Early Childhood Intervention (ECI) Services from Bloom Healthcare

**For children aged 0–9 with developmental delays
or disabilities**

At Bloom Healthcare, we provide NDIS Early Childhood Intervention (ECI) services to help children and families thrive. Our services are tailored to meet the unique needs of each child and are delivered by a team of caring professionals in natural, everyday settings.

What is Early Childhood Intervention (ECI)?

Early Childhood Intervention supports children aged 0–9 with developmental delays or disabilities. It focuses on helping children:

- Learn new skills.
- Participate in family life and the community.
- Build confidence and independence.

What We Offer

1. Personalised Support for Families and Children

- Services for children with developmental delays or disabilities.
- Family-centred care focused on your priorities and goals.

2. A Collaborative Team - Our allied health professionals include:

- Speech Pathologists
- Occupational Therapists
- Physiotherapists
- Psychologists

3. Support in Everyday Settings

- Therapy delivered at home, school, or in the community.
- Practical strategies to use during meals, play, or learning.

Key Features of Our Services

Family-Centred Care

We work with parents and caregivers to:

- Understand your child's strengths and needs
- Teach strategies to support your child's development.

Neuroaffirming Practice

- We celebrate neurodiversity, focusing on what makes each child unique.

Inclusion and Participation

- Helping children take part in family, school, and community life.

Evidence-Based Support

- Using proven methods to ensure the best outcomes for your child.

Our Services Include

- **Speech Pathology:** Helps with communication and social skills.
- **Occupational Therapy:** Supports fine motor skills and daily activities like dressing or eating.
- **Physiotherapy:** Improves mobility, balance, and coordination.
- **Developmental Assessments:** Identifies your child's needs and creates a tailored plan.
- **Parent Coaching:** Provides tools and strategies for families to support their child's learning.

Why Early Intervention Matters

- Supports brain development during the critical early years.
- Builds essential life skills.
- Promotes inclusion in school and community settings.
- Helps children gain independence and confidence.

How to Access Our Services

You can:

1. Use an active NDIS plan.
2. Ask your doctor or health professional for a referral.
